Ten Tweets For 2010

Brevity used to be the soul of wit; now it's the badge of banality. But twitter is the word of the year, and we like a challenge....

So no 2010 tome from us; we'll post ten short pieces on our blog over the holidays, and send them all out on January 5.

Here's the summary, Part 1 and a favourite reading list.

The Great Divide: correlations cluster near one in crises; now it's not so macro. Re-focus on alpha and country specific trades.

Think 1890s: a deflationary recovery that may feel like a depression. Plus Robots and Virtual Worlds and How To Live Forever.

Out of the Valley of Debt: for US consumers, it's all about income, not debt. Plus "rational re-balancing" and "discounted decadence."

Oil as a Policy Tool: why the Saudis set oil prices for now. And how they could be the key to recovery.

Sovereign Debt Sustainability: why growth, not inflation, is the solution. Plus "the entitlement endgame."

Exits and Entrances: time for the BoJ to get serious, timing the exit elsewhere.

Decoupling: was one of the 2008 buzz words. But not 2009! What about 2010?

Bubbles Here, Bubbles There, Bubbles Everywhere: except that we can't find them anywhere. Look east, young man....

Brunnermeier on Bubbles: why rational arbitrageurs ride bubbles and how trivial news can trigger crashes (by synchronising selling).

In Gold We Trust: a momentum trader's dream. Oh, oh, we just found one (a proto-bubble that is).

We wish all our readers peaceful holidays and a less dramatic New Year.

The Great Divide:

The outlook... is uncertain in a very specific sense: two very different "equilibrium" outcomes are possible for the world economy and markets, that are poles apart. A simple way to capture this is to say that the S&P 500 could end the year around 1200 to 1300 in the "healing" equilibrium, but nearer 650 - and falling - in the "bad" equilibrium. Market Focus: Overwhelming Force

We wrote that in December 2008, and argued that "healing" was ultimately more likely than deflationary breakdown. We went to the brink, but global production and risk assets bottomed out in March and have recovered powerfully since.

As we write, global industrial production, our world wealth index, funding liquidity in the financial system, credit spreads, emerging equities and the leading "digital lifestyle" stocks are back at their pre-Lehman levels or slightly better. Not surprisingly, the recovery has been much less complete in most developed equity markets, financial stocks and commodities, but the systemic part of the crisis seems to be over.

If that is right, then country, sector and stock specific news will drive markets and investment returns as much or more than global macro trends. Stock picking and idiosyncratic risk should be far more rewarding in equities and credit; while spreads, relative value and range trading dominate the interest rate world. And different commodities dance to their own tune.

Ironically, however, we could *almost* apply our opening paragraph from last year to 2010: we expect the healing process and recovery to consolidate as income growth, collateral values and credit availability improve, but it can't be totally excluded that we will restart the vicious debt deflation spiral.

The most obvious risk is a rolling sovereign debt crisis that undermines investor confidence, not only in the long-term creditworthiness of governments, but by extension in the banks and financial institutions that they have guaranteed or underwritten. Here we expect the BoJ and the ECB to play pivotal roles in staving off any systemic impact within Europe and Japan, while the UK will experience all the volatility you might expect in an election year.

Otherwise, our key macro themes can be summed up very succinctly. We think this will be (once again) a disinflationary recovery: 10-year G3+ real yields will end the year higher, breakevens lower and nominal yields little changed. We think the three stages of the "exit strategy" (winding down QE, raising interest rates and fiscal consolidation) will help cap the upside for equities, though 1250-1300 for the S&P 500 will be achievable at some point. And the key for us to the fate of financials will ultimately be US house prices - the most important collateral within the (global) financial system - and in our view, extremely cheap.

It will be a slow and granular grind to find more rational workouts than foreclosure, however, and establish a proper base for more sensible pricing. In that context, the profile for global IP growth - where momentum should slow quite sharply in the February to May period - and the gradual winding down of QE suggest the potential for a risk asset correction in the first half rather than the second. That also happens to fit the history of post-crash rebounds, as shown in Exhibit 1 below.

Pessimism about the medium-term outlook still rules, in our view, but investor sentiment for the shorter term may just be a little too happy. This is a time to keep "hope on a short leash" and be ready to fade extreme fears as and when they arise.

In sum, though we expect the healing process to progress in 2010, the stakes remain extremely high and the potential for policy error or sheer bad luck non-trivial. Even if it proves to be a much less dramatic year for markets, it is unlikely to be straightforward or any less intellectually challenging. Happy Holidays!

Emerging Markets Bond Recommendation Definitions

Buy: Indicates a recommended buy on our expectation that the issue will deliver a return higher than the risk-free rate.

Sell: Indicates a recommended sell on our expectation that the issue will deliver a return lower than the risk-free rate.

Corporate Bond Fundamental Recommendation Definitions

Buy: Indicates a recommended buy on our expectation that the issue will be a top performer in its sector.

Outperform: Indicates an above-average total return performer within its sector. Bonds in this category have stable or improving credit profiles and are undervalued, or they may be weaker credits that, we believe, are cheap relative to the sector and are expected to outperform on a total-return basis. These bonds may possess price risk in a volatile environment.

Market Perform: Indicates a bond that is expected to return average performance in its sector.

Underperform: Indicates a below-average total-return performer within its sector. Bonds in this category have weak or worsening credit trends, or they may be stable credits that, we believe, are overvalued or rich relative to the sector.

Sell: Indicates a recommended sell on the expectation that the issue will be among the poor performers in its sector.

Restricted: In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Not Rated: Credit Suisse Global Credit Research or Global Leveraged Finance Research covers the issuer but currently does not offer an investment view on the subject issue.

Not Covered: Neither Credit Suisse Global Credit Research nor Global Leveraged Finance Research covers the issuer or offers an investment view on the issuer or any securities related to it. Any communication from Research on securities or companies that Credit Suisse does not cover is a reasonable, non-material deduction based on an analysis of publicly available information.

Corporate Bond Risk Category Definitions

In addition to the recommendation, each issue may have a risk category indicating that it is an appropriate holding for an "average" high yield investor, designated as **Market**, or that it has a higher or lower risk profile, designated as **Speculative** and **Conservative**, respectively.

Credit Suisse Credit Rating Definitions

Credit Suisse may assign rating opinions to investment-grade and crossover issuers. Ratings are based on our assessment of a company's creditworthiness and are not recommendations to buy or sell a security. The ratings scale (AAA, AA, A, BBB, BB, B) is dependent on our assessment of an issuer's ability to meet its financial commitments in a timely manner. Within each category, creditworthiness is further detailed with a scale of High, Mid, or Low – with High being the strongest sub-category rating: **High AAA, Mid AAA, Low AAA** – obligor's capacity to meet its financial commitments is extremely strong; **High AA, Mid AA, Low AA** – obligor's capacity to meet its financial commitments is very strong; **High A, Mid A, Low A** – obligor's capacity to meet its financial commitments is strong; **High BBB, Mid BBB, Low BBB** – obligor's capacity to meet its financial commitments is adequate, but adverse economic/operating/financial circumstances are more likely to lead to a weakened capacity to meet its obligations; **High BB, Mid BB, Low BB** – obligations have speculative characteristics and are subject to substantial credit risk; **High B, Mid B, Low B** – obligor's capacity to meet its financial commitments is very weak and highly vulnerable to adverse economic, operating, and financial circumstances; **High CCC, Mid CCC, Low CCC** – obligor's capacity to meet its financial commitments is extremely weak and is dependent on favorable economic, operating, and financial circumstances. Credit Suisse's rating opinions do not necessarily correlate with those of the rating agencies.

CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. CS does not advise on the tax consequences of investments and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report.

CS may, to the extent permitted by law, participate or invest in financing transactions with the issuer(s) of the securities referred to in this report, perform services for or solicit business from such issuers, and/or have a position or holding, or other material interest, or effect transactions, in such securities or options thereon, or other investments related thereto. In addition, it may make markets in the securities mentioned in the material presented in this report. CS may have, within the last three years, served as manager or co-manager of a public offering of securities for, or currently may make a primary market in issues of, any or all of the entities mentioned in this report or may be providing, or have provided within the previous 12 months, significant advice or investment services in relation to the investment concerned or a related investment. Additional information is, subject to duties of confidentiality, available on request. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4JQ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States and Canada by Credit Suisse Securities (USA) LLC; in Switzerland by Credit Suisse AG; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A.; in Japan by Credit Suisse Securities (Japan) Limited, Financial Instruments Firm, Director-General of Kanto Local Finance Bureau (*Kinsho*) No. 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan, Japan Securities Investment Advisers Association; elsewhere in Asia/ Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse AG, Singapore Branch, and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse AG, Taipei Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020. This research may not conform to Canadian disclosure requirements.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

This material is not for distribution to retail clients and is directed exclusively at Credit Suisse's market professional and institutional clients. Recipients who are not market professional or institutional investor clients of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.
